Case Daily - February 09, 2006

A MESSAGE FROM HOSSEIN SADID, CHIEF FINANCIAL AND ADMINISTRATIVE OFFICER

Case is in the process of concentrating all of its energies and resources on advancing our academic mission and campus environment. Doing that means we have to better align our expenditures with available resources in keeping with our strategic priorities.

An **Integrated Core Planning and Budget Committee** has been working on a five-year planning and budget recommendation. This process will drive both short-term and long-term budget strategy for the university. While that planning continues through the spring, we have decided to put a temporary hold with the vendors involved in our previously announced plans to move some of our administrative staff to the Halle Building in downtown Cleveland. We do understand that we have an existing lease agreement at the Halle Building and we are discussing all available options with our partner Forest City Enterprises and with the City of Cleveland.

Our concentrated efforts to manage resources and investments for the future form a solid platform for Case to achieve its vision and continue our pursuit in excellence in research, educations and service.

CAMPUS NEWS

The Academic Integrity Board will host a campus-wide promotion of academic integrity during **Case's first annual "Integrity Week"** February 27 through March 3. The series of events will encourage students and faculty to reflect on their roles in an ethical context.

Case's 121 Fitness Center is offering special Valentine's Day classes to share with your sweetheart, including "Partner Yoga" on February 13 at 7 p.m., along with several classes on February 14, such as a 6 a.m. "Chocolate Yoga" class and a 5:30 p.m. "Partner Cardio Kick" class. February 14 is free guest day, and non-members can attend these classes for free. Call x1121 or e-mail onetoon@case.edu.

Every Thursday from 10-11p.m. **"Live from Cleveland"** presents local and regional bands playing live in the studios of WRUW-FM 91.1. All programs on WRUW can be accessed for one week online at <http://www.wruw.org/guide/>.

CASE IN THE NEWS**"Doubts Cast on a Trove of Supposed Pollocks"**

The New York Times, February 9, 2006

<http://www.nytimes.com/2006/02/09/arts/design/09poll.html>

A physicist [at the University of Oregon] who is broadly experienced in using computers to identify consistent patterns in the drip paintings of Jackson Pollock has determined that half a dozen small paintings recently discovered and claimed by their owner to be original Pollocks do not exhibit the same patterns. [The finder of the paintings and a Manhattan art dealer] sought the advice of **Ellen G. Landau**, the author of a well-regarded 1989 Pollock monograph and one of the world's most respected authorities on the artist's work. Dr. Landau, a professor at **Case Western Reserve University** in Cleveland, examined the paintings, came to the conclusion they were authentic and agreed to help with scholarship for an exhibition this year, the 50th anniversary of Pollock's death.

"Pair look to reboot the brain: Computer chip may help people walk again"

The Arizona Republic, February 9, 2006

<http://www.azcentral.com/arizonarepublic/business/articles/0209innovator09.html>

Ranu Jung and **Jimmy Abbas** are at the forefront of research that could help people recover from spinal cord injuries and diseases, enable paralyzed people to stand and walk and allow amputees to use brain waves to move artificial limbs. The husband-and-wife team co-direct the Center for Rehabilitation Neuroscience and Rehabilitation Engineering at the Biodesign Institute at Arizona State University. The couple met as graduate students at **Case Western Reserve University** in Cleveland. Both were interested in the effects of spinal cord injuries but pursued different lines of research. Eventually they realized their work was very compatible and teamed up.
